

Don't Let Phishing Hook You

Phishing is the latest scheme from Internet hackers who pretend to be a legitimate financial institution or credit card company through “official-looking” emails to trick consumers into sending them personal and/or financial information.

Don't be a victim!

Remember: Savannah Federal Credit Union will NEVER request confidential financial information or personal data by email.

Here are some tips to avoid getting hooked by phishing:

- Don't reply or click links in emails that ask for personal or financial information.
- Review all financial statements as soon as you receive them.
- Be careful about opening attachments or downloading any files from emails.
- Before submitting financial information through a website, look for the “lock” icon on the browser's status bar to confirm a secure transmission.
- Treat all email with suspicion.
- Contact us as soon as possible to report any suspicious emails claiming to be from Savannah Federal Credit Union. For system security, do not forward the suspicious email, but provide details in a new email.

To report or ask questions about Phishing, call us at 912-234-8978 or email us at admin@savannahfederal.org.
